### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Willinski on December 30, 2009.

The application has been amended as follows:

Claim 56 now reads:

56. An apparatus comprising:

a request and results processing server; and

a search engine server;

wherein the request and results processing server includes a content search suggestion engine configured to suggest programming content based on at least one of a user's past search criterion and previously downloaded content, and

wherein the search engine server includes a search engine processor configured to maintain a list of a plurality of active searches based on the user's past search criterion responsive to determining that the user's past search criterion does not yield a matching result with respect to a program content database~~maintain a list of a plurality of active searches related to the suggested programming content~~, and wherein the search engine processor is configured to receive a notification that a change is made to the~~a~~ program content database, and wherein the search engine processor is configured

to determine that a match exists between the list of active searches and the change made to the program content database, and wherein the search engine server is configured to forward a notification of the match to the request and results processing server responsive to determining that a match exists between the list of active searches and the change made to the program content database.

2. The following is an examiner's statement of reasons for allowance:

The claimed invention has been amended to include an "active search" feature wherein searches which are performed which generate no hits are saved as 'active searches' an re-applied whenever there is a change to local or remote databases to determine whether the changes would generate a respective hit. The closest prior art found was U.S. Pre-grant Publication 2002/0065812 to Keith, Jr., who teaches manually saving searches which are applied whenever a change is made to a database for the purpose of alerting the user who saved the search to changes of interest (see paragraph 0095). The characteristic which distinguishes applicant's invention from the prior art is the inclusion of the save feature that defines which searches are designated as 'active searches', namely, the automated saving of searches which generate no hits, rather than manual designation by a user.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Oath/Declaration***

3. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

No oath or declaration has been filed.

4. Applicant is now required to submit a substitute declaration or oath to correct the deficiencies set forth in this communication. The substitute oath or declaration must be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability" (PTO-37). Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136. Failure to timely file the substitute declaration (or oath) will result in **ABANDONMENT** of the application. The transmittal letter accompanying the declaration (or oath) should indicate the date of the "Notice of Allowance" (PTOL-85) and the application number in the upper right hand corner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DOMINIC D. SALTARELLI whose telephone number is (571)272-7302. The examiner can normally be reached on Monday - Friday 9:00am - 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Miller can be reached on (571) 272-7353. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
